

THE NEX GENERATION

OF GOLF SIMULATOR ENCLOSURES

Our Story

Since 2005, our team has been manufacturing high-end residential and commercial golf simulators. Over the years, we have gained expertise in designing and producing golf simulator enclosures. In order to meet the needs of leading golf simulator companies, we have developed a high-quality product that exceeds expectations. Our goal? To manufacture the best golf simulator booths on the market. Hence, the creation of SimBooth.

High-quality Products

- **Made of aluminum:** all our booths are made of 6063-T52 quality of aluminum, which provides solid, durable, and light weight golf simulator structures.
- **Solid panels:** built with aluminum, wood, and high-quality turf, SimBooth enclosures give the client's setup a professional and aesthetic look.
- **Full surface floor:** All of our surfaces are leveled with the screen border to provide the best golfing experience from the driver to the putter.
- **Creased-free screen:** The screen is stretched from top to bottom and side-to-side to assure the best image quality.
- **Outstanding finish and professional look:** we provide our customers with the best products made with high-quality North American materials.
