

# Smart Putting System

The smart putting system perfectly replicates the undulating terrain of a real golf course, delivering an immersive playing experience. Combined with the advanced GOLFJOY software, this system allows you to feel the challenges and joys of a real course from the comfort of your home. Enhancing your golf skills has never been this easy and convenient.

The only putting system in the golf industry that allows the ball to be putted into the hole.

## Comprehensive green terrain replication

Whether it's uphill, downhill, or complex sloping terrain, the system precisely simulates every change in green gradients, delivering an immersive putting experience that faithfully reproduces every detail of the course.

## Three precise hole cup settings

Featuring three sets of hole cups at varying distances, designed at a 1:1 scale to replicate real course situations like "lip-outs" and "just missing the hole." This allows you to experience putting challenges identical to those in actual competitions.

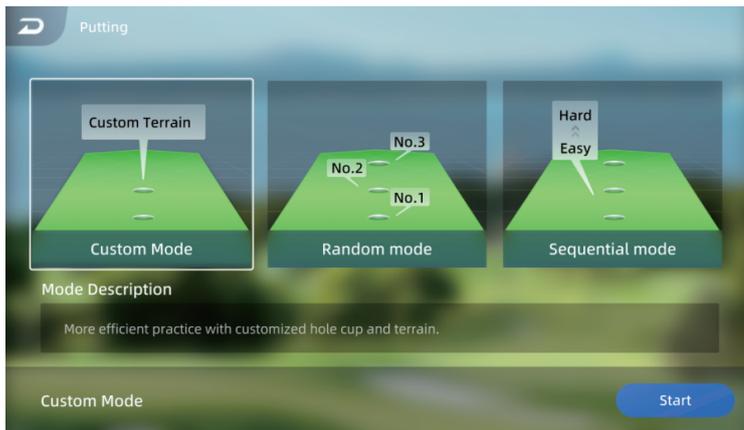

## Smart Putting System

With advanced ball-aiming and line-reading features, it accurately simulates real putting scenarios even indoors. This significantly improves your short-putt skills, ensuring you excel when it matters most.

## Comprehensive Putting Training Mode

Three carefully designed putting training modes—Custom Mode, Random Mode, and Sequential Mode—cater to the needs of everyone from beginners to seasoned

### Custom Mode

Adjust slope height and hole cup distance to your preference, creating a personalized putting training experience.

### Random Mode

Simulate the unpredictability of real greens, making every shot feel like a real game, enhancing your decision-making and adaptability.

### Sequential Mode

Progress step-by-step from basic to advanced levels, helping you steadily improve your putting skills. Whether you're a novice or an experienced player, this mode offers valuable benefits.

We also offer professional chipping training, covering all aspects of short game skills. Whether it's putting or chipping, our system helps you master every key technique in golf, enhancing your overall performance on the course.

## Auto Tee-Up System

The GOLFJOY Auto Tee-Up System is an intelligent and efficient golf device that automatically senses when a ball has been hit and quickly raises the next ball, ensuring a seamless and uninterrupted practice experience. It completely eliminates the hassle of retrieving and manually placing balls. Designed with precision, the system operates smoothly, without any jamming issues, and produces minimal noise, allowing you to focus on your swings in a quiet environment.

Whether for personal use at home or in golf practice ranges and commercial venues, the GOLFJOY Auto Tee-Up System provides an exceptional level of convenience and comfort. Its durable construction and long-lasting performance make it suitable for high-intensity use, requiring minimal maintenance so you can focus on improving your skills. With this system, you'll not only enjoy continuous, efficient practice but also greatly enhance the fun and effectiveness of your training, ensuring that each swing feels effortless and natural.
